

Kelvin Grove Mini-Change

The mini-change for Kelvin Grove consists of an overpass with landscaping spanning the highway, with north and southbound on/off ramps from the highway in a diamond configuration. The mini-change provides several advantages over the current situation, including:

- Separates local traffic from Sea to Sky Highway
- Facilitates vehicle movements in all directions

- Sidewalks on the north side of the overpass and ramps will facilitate safe pedestrian traffic across the highway
- New on-ramp/off-ramp lanes
- New on-ramps and off-ramps
- New and improved off-highway transit stop location
- Safer connectivity between Upper and Lower Kelvin Grove for pedestrians, cyclists and vehicles
