

Landscape Options New Pullout (East Side of Old Highway)

A new pullout will be built on the east side of the old highway, south of the new North Junction. The pullout provides views of the local area and a stop for travelers. This pullout will be accessible to northbound and southbound traffic and have parking capacity for 10 cars. There are two landscape options for the new pullout.

Option 1: Grass

Option 1 provides for a grassed surface between the parking area and the old highway.

Option 2: Trees & Shrubs

Option 2 provides trees and shrubs that screen the old highway from the parking area.
