

New Pullout

- A new pullout will be built on the east side of the existing highway, south of the new North Junction providing views of the local area.
- The pullout will be accessible to northbound and southbound travelers.
- The pullout will have parking capacity for 10 cars.

Typical Cross-Section

The highway design in West Vancouver provides improved safety, reliability and capacity by:

- Providing a four-lane divided highway through West Vancouver
- Providing widened paved shoulders to provide more room to accommodate cycling and emergency pull-offs
- Providing center median barrier to prevent head-on collisions

In addition, highway improvements will:

- Improve sightlines
- Provide smoother transitions into curves
- Generally improve the consistency and standards of driving
- Provide improved acceleration and deceleration lanes for entrances to and exits from the highway

Additional highway safety features:

- Highly reflective pavement parking (Rainline)
- Roadside rumble strips
- Roadside delineators to assist in keeping drivers alert and driving safely

Bus Stops

- The southbound bus stop will be relocated to connect with the new Pasco Road access road.
- A new northbound bus stop will be built across from the southbound bus stop.

Gateways

- A Northbound Sea to Sky Highway marker would be located approximately 2.5 km from the Nelson Creek Bridge.
- The Southbound Gateway would be located at the Municipal Boundary to West Vancouver
