

Community Gateway Features

In Whistler, consistent with community input, a new gateway is proposed to be located just south of the Function Junction intersection. This location would define the entry into the Resort Municipality of Whistler, in a similar manner to other communities on the corridor, but with distinctive elements unique to Whistler.

Elements of Continuity are consistent features that identify the Sea-to-Sky Highway corridor as a system from West Vancouver to Whistler.

Elements of Distinction are features developed in consultation with each community at the detailed design phase, representing each community as a unique place and destination.

Community Links

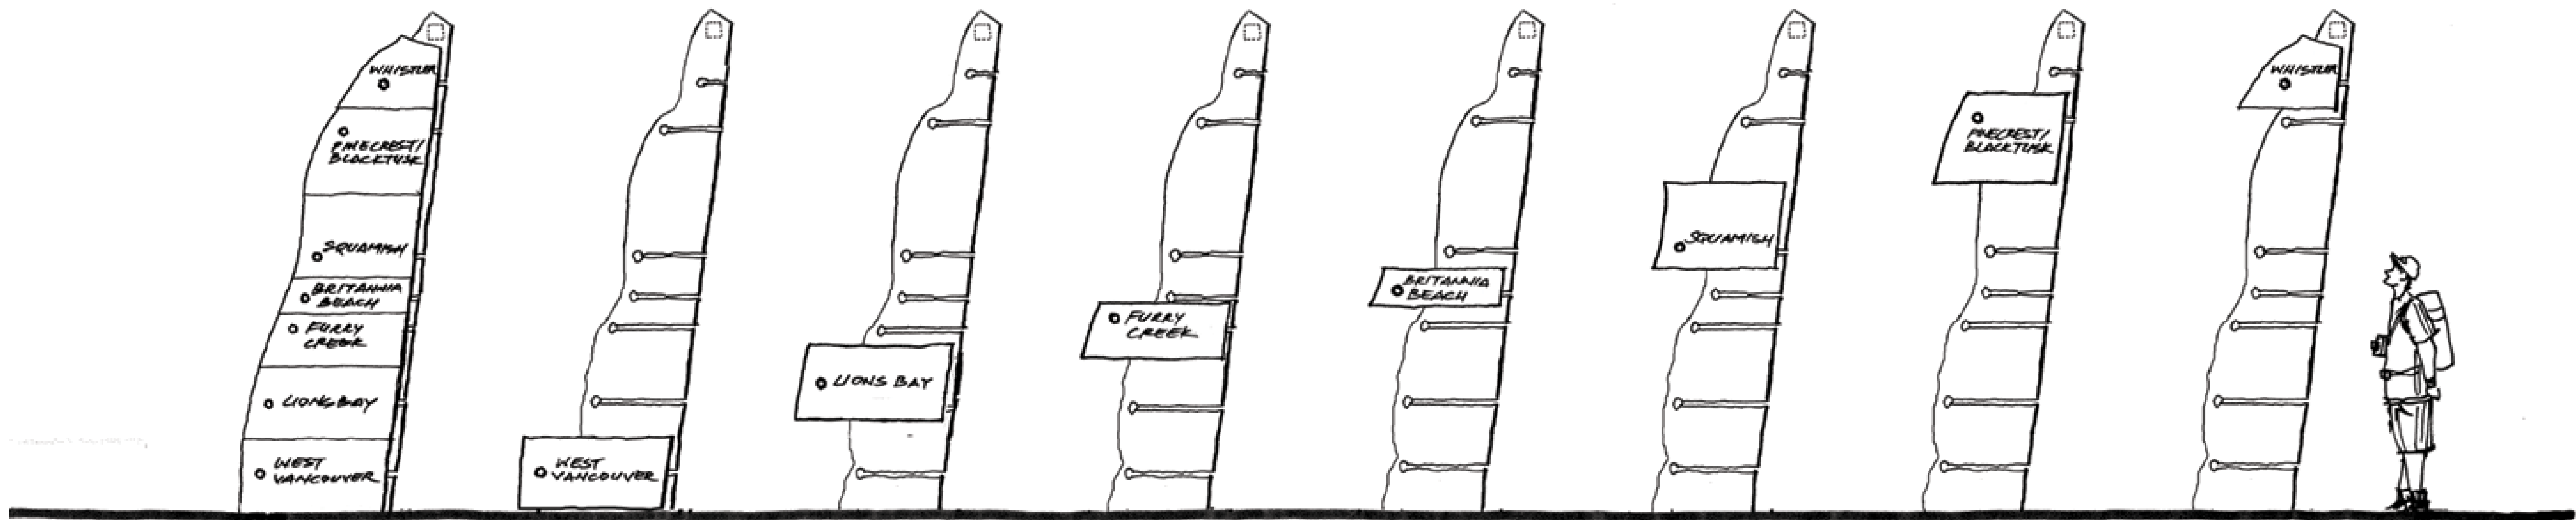

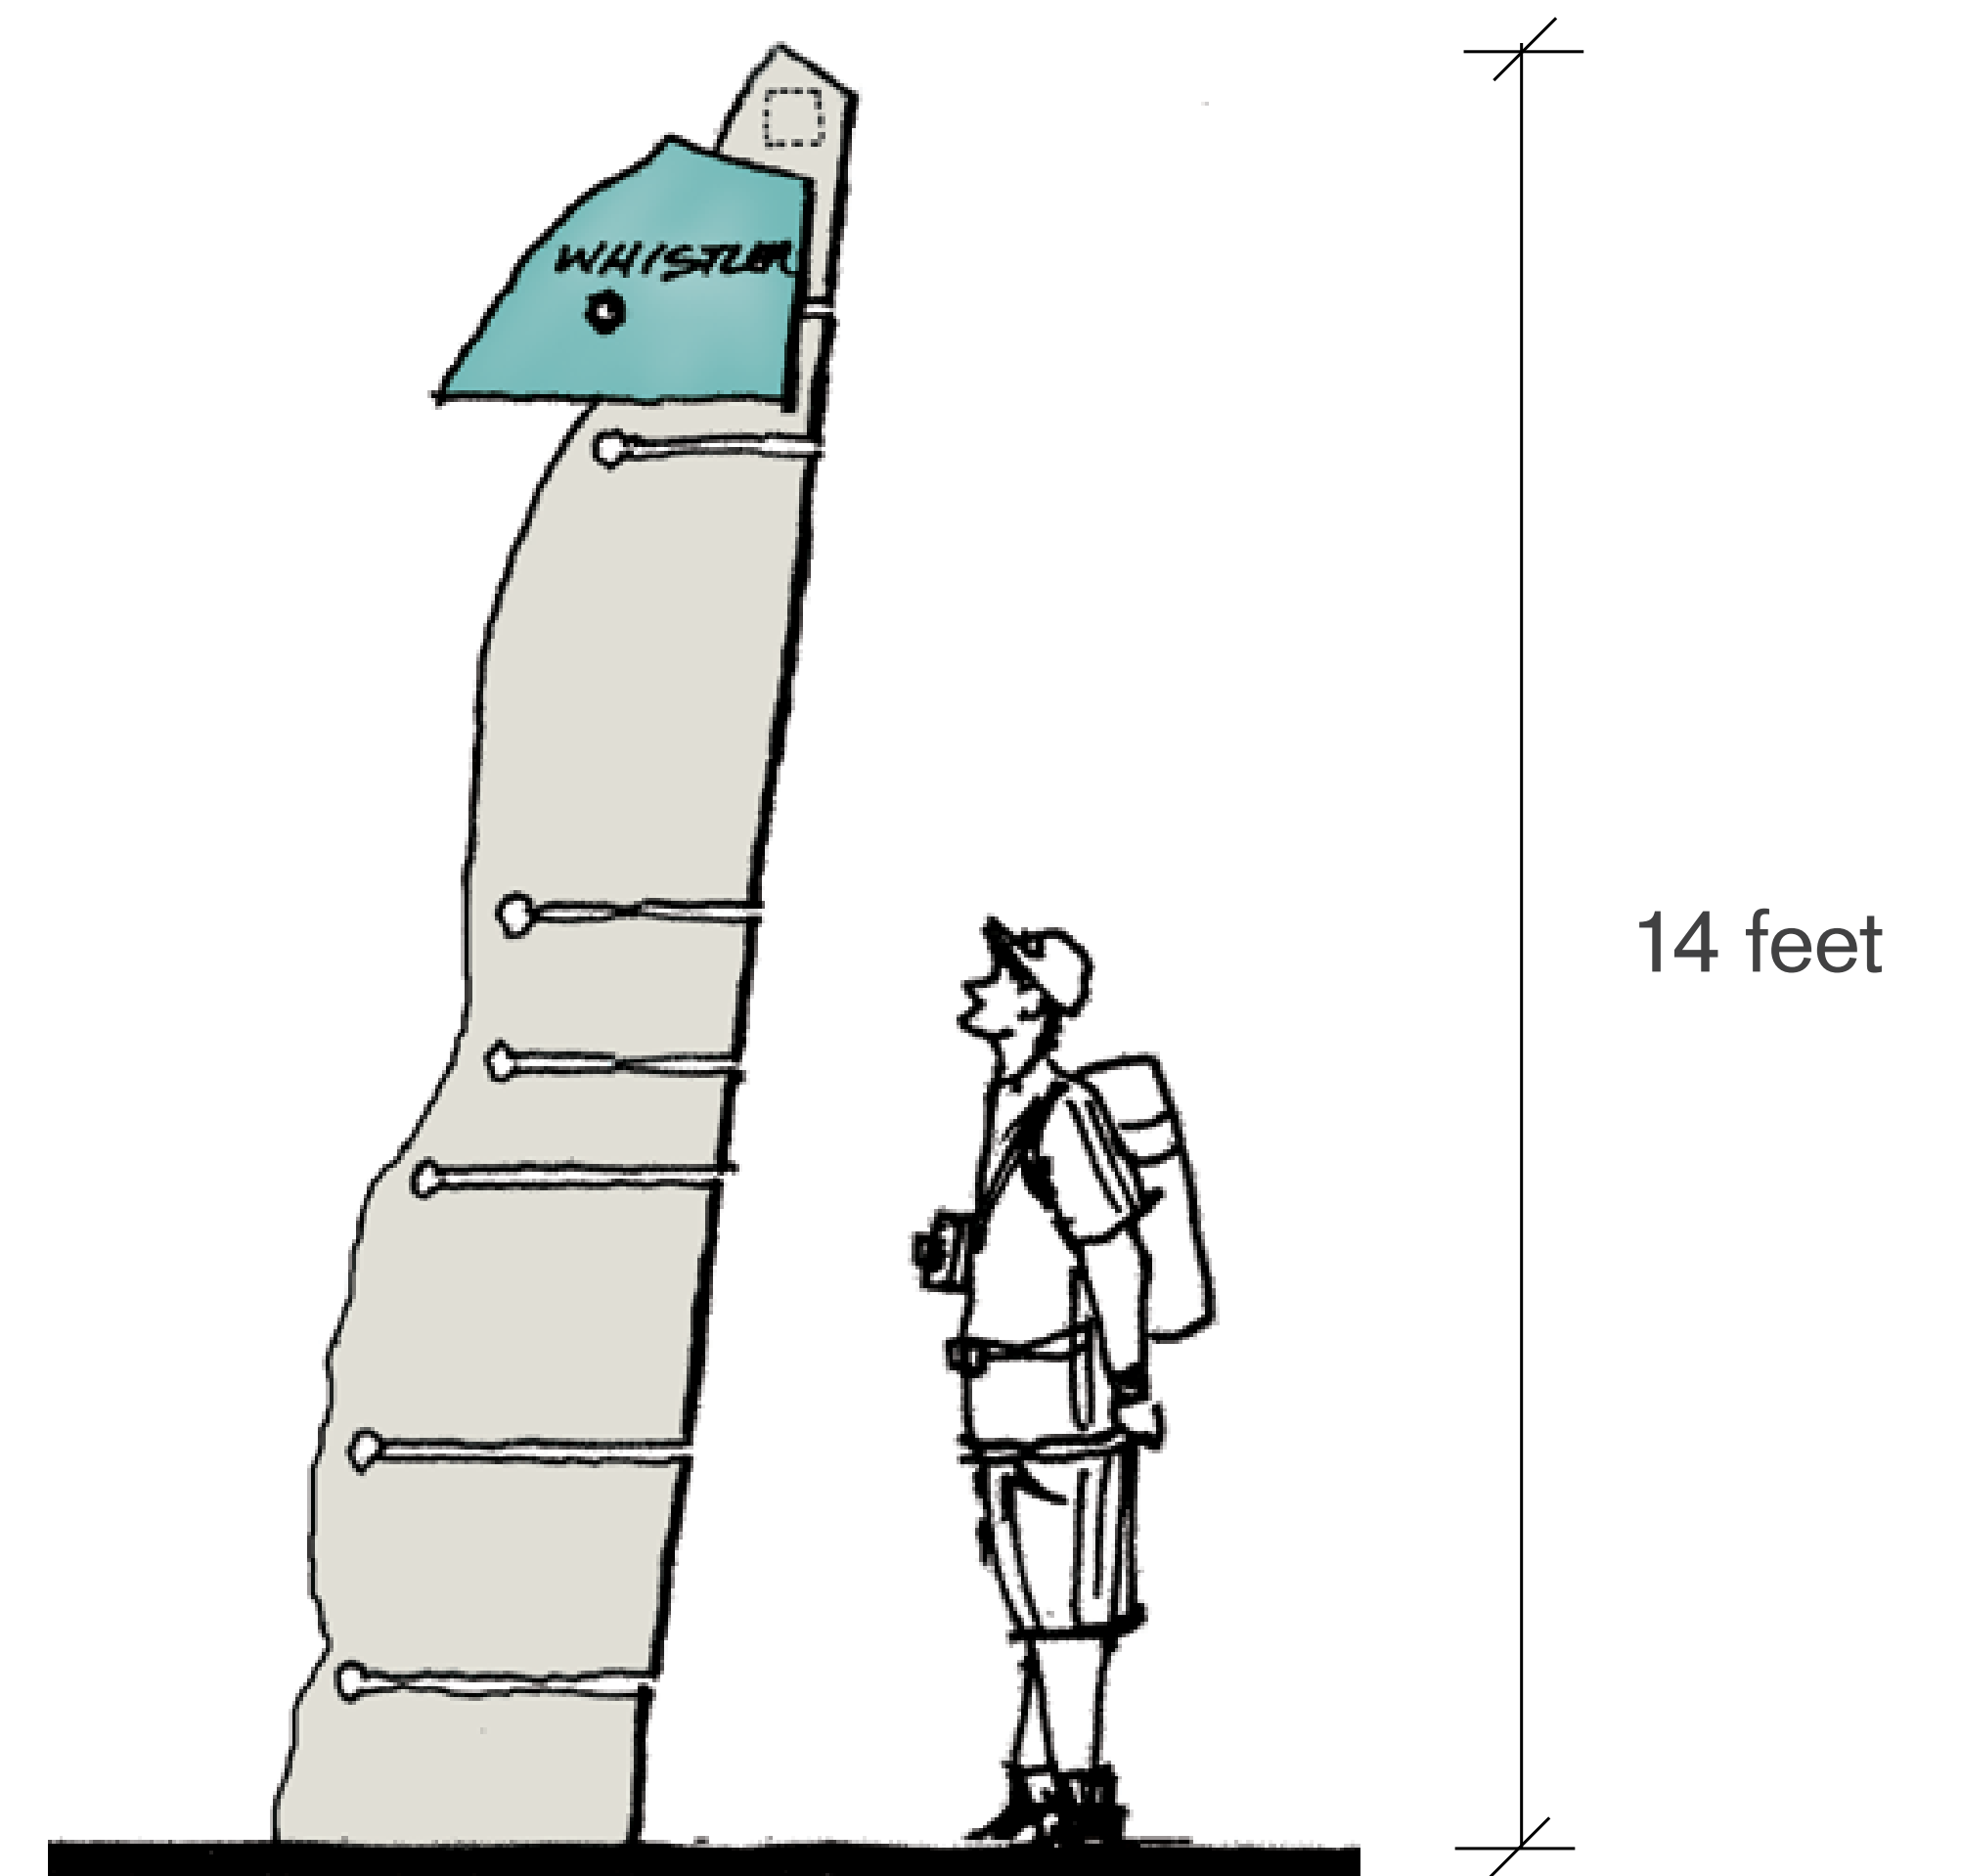

Elements of Continuity

- vertical face (wood or metal) with carved edge representing the curve of the Sea-to-Sky Highway
- locations of corridor communities along the highway marked with a line

Elements of Distinction

- unique glass-like, metal or wooden coloured sleeve featuring the name of the community
- emphasizes the name of the community being entered
- considers input from the community

The **Community Links option** shows the location of each community while highlighting the idea of being linked in a network of corridor communities. It is approximately 14 feet high and could be illuminated from within or by spotlight.

Community Rings

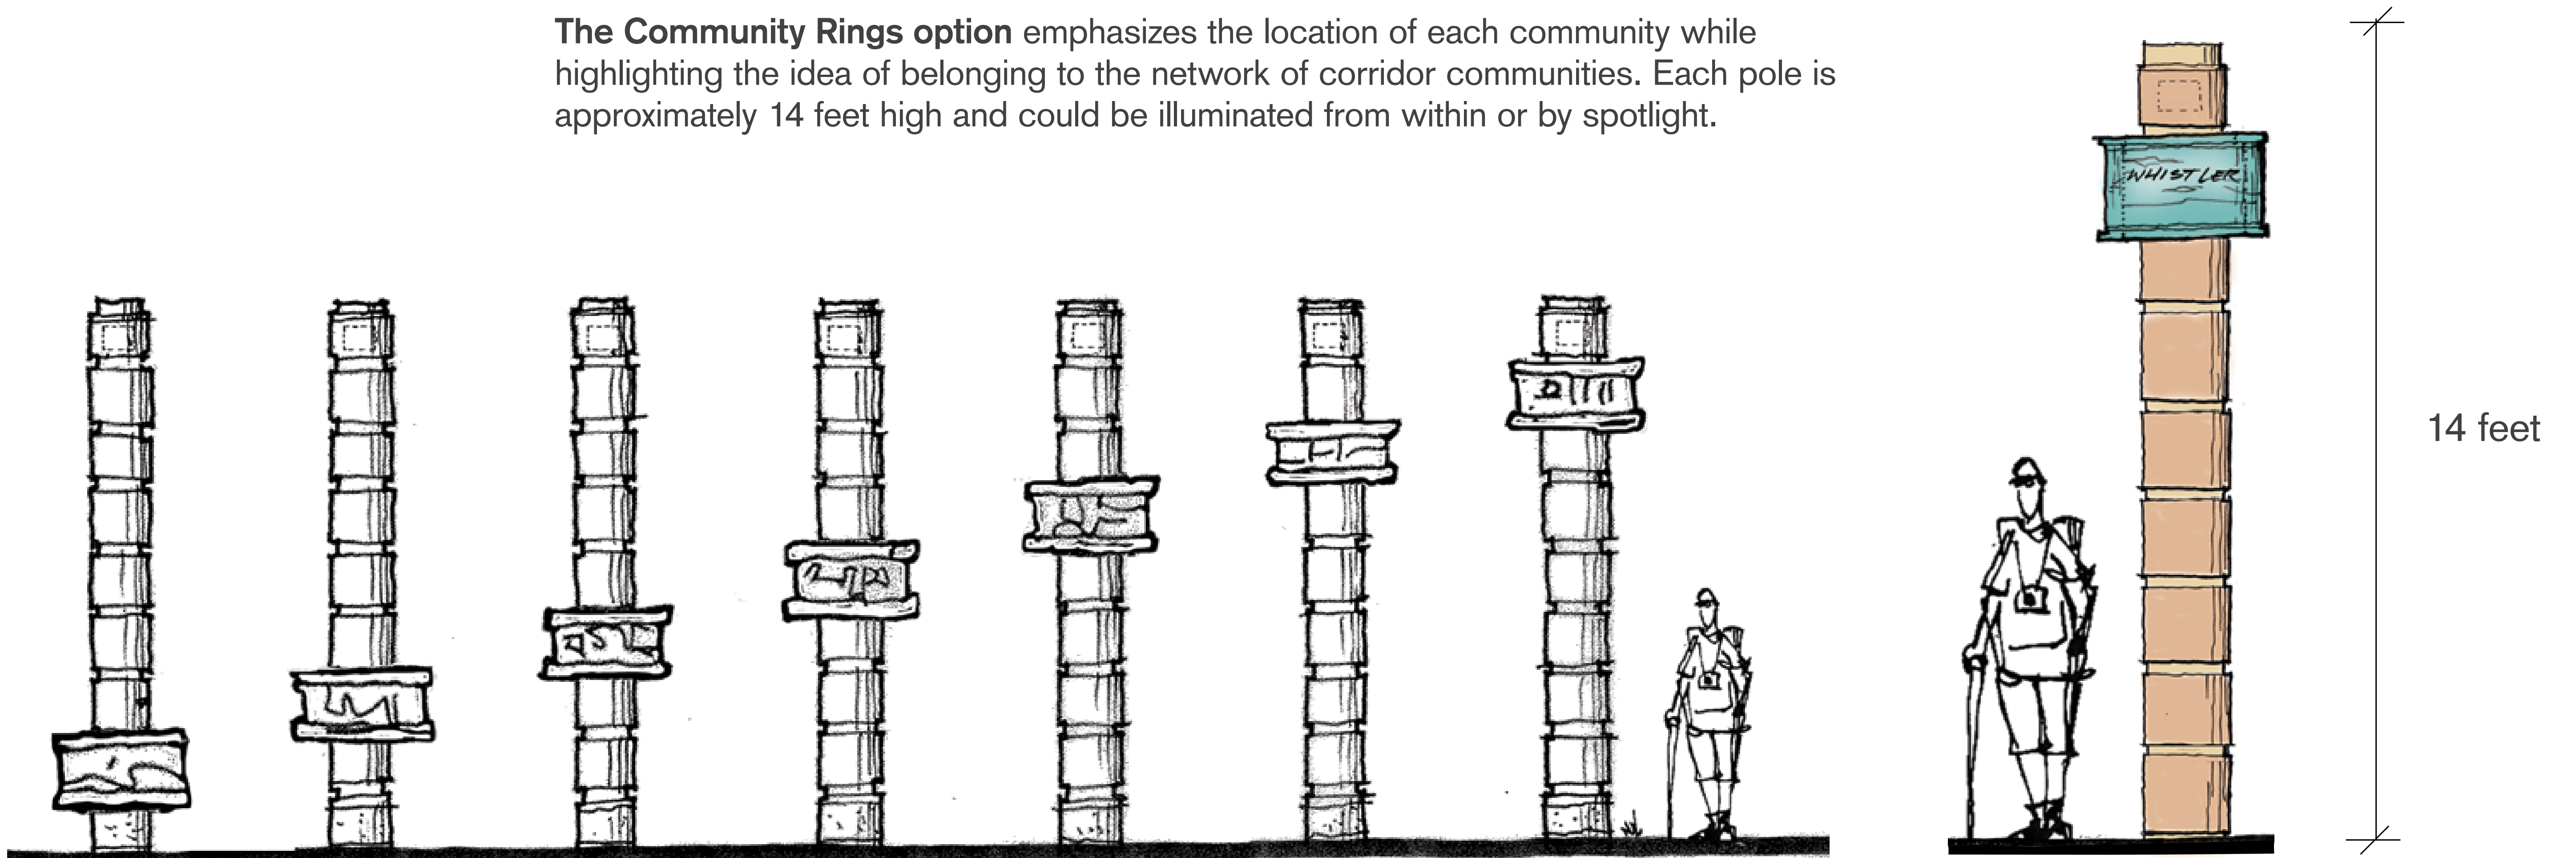

Elements of Continuity

- vertical pole (wood or metal)

Elements of Distinction

- unique glass-like, metal or wooden coloured band featuring the name of the community
- emphasizes name of community being entered
- considers input from the community

The **Community Rings option** emphasizes the location of each community while highlighting the idea of belonging to the network of corridor communities. Each pole is approximately 14 feet high and could be illuminated from within or by spotlight.

Community Blades

Elements of Continuity

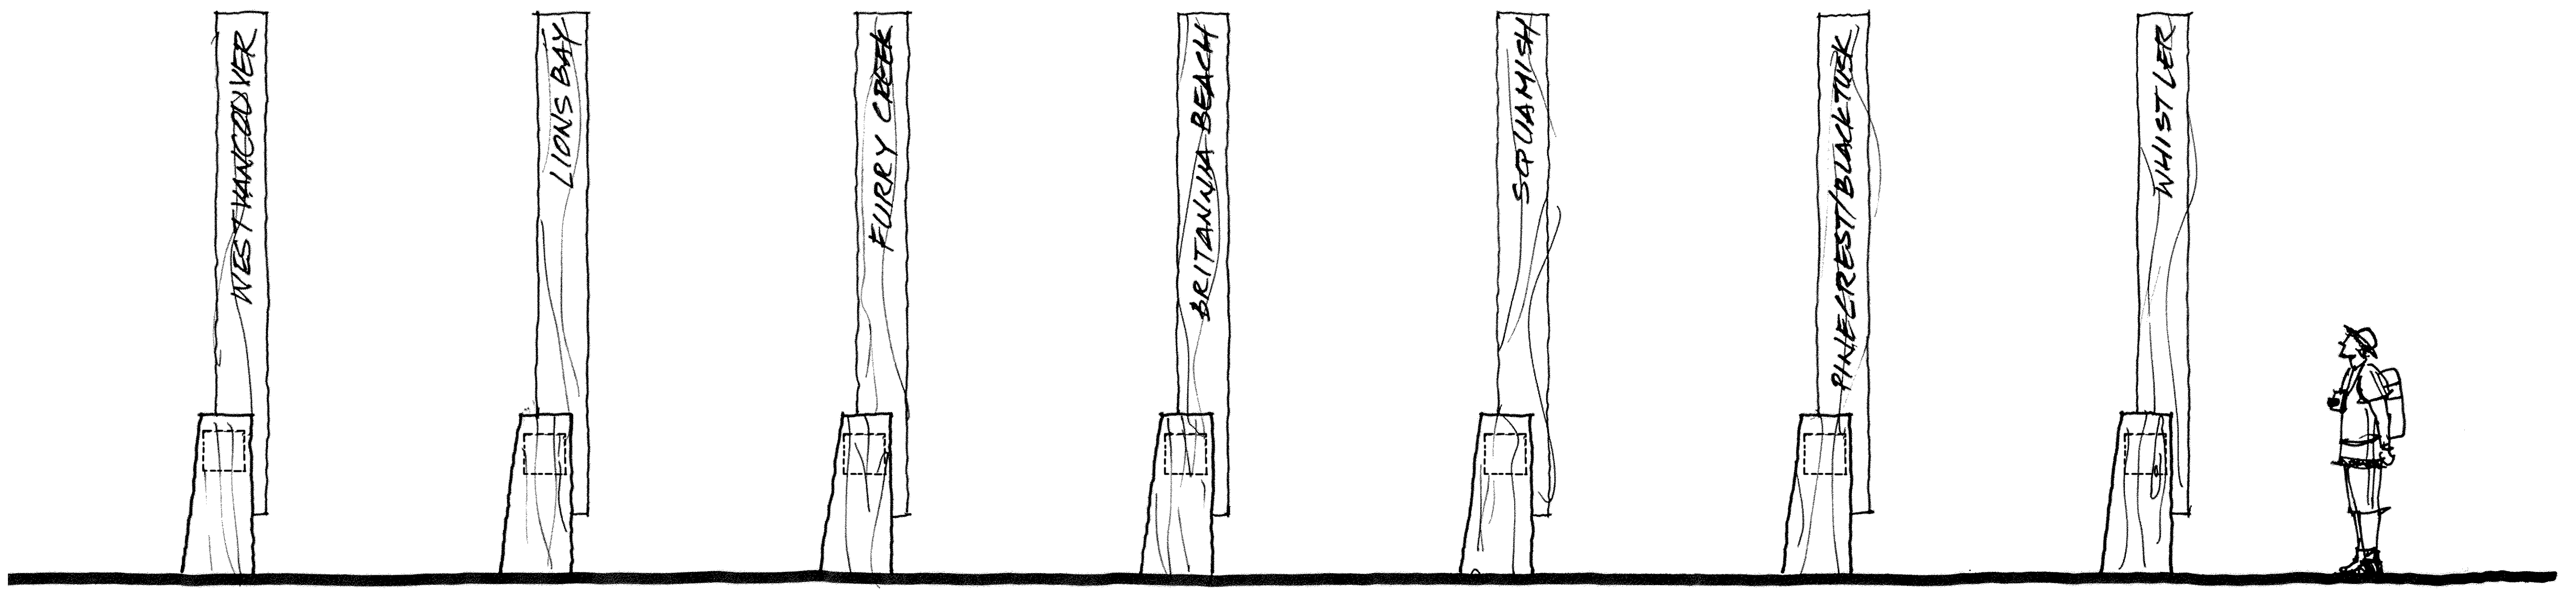

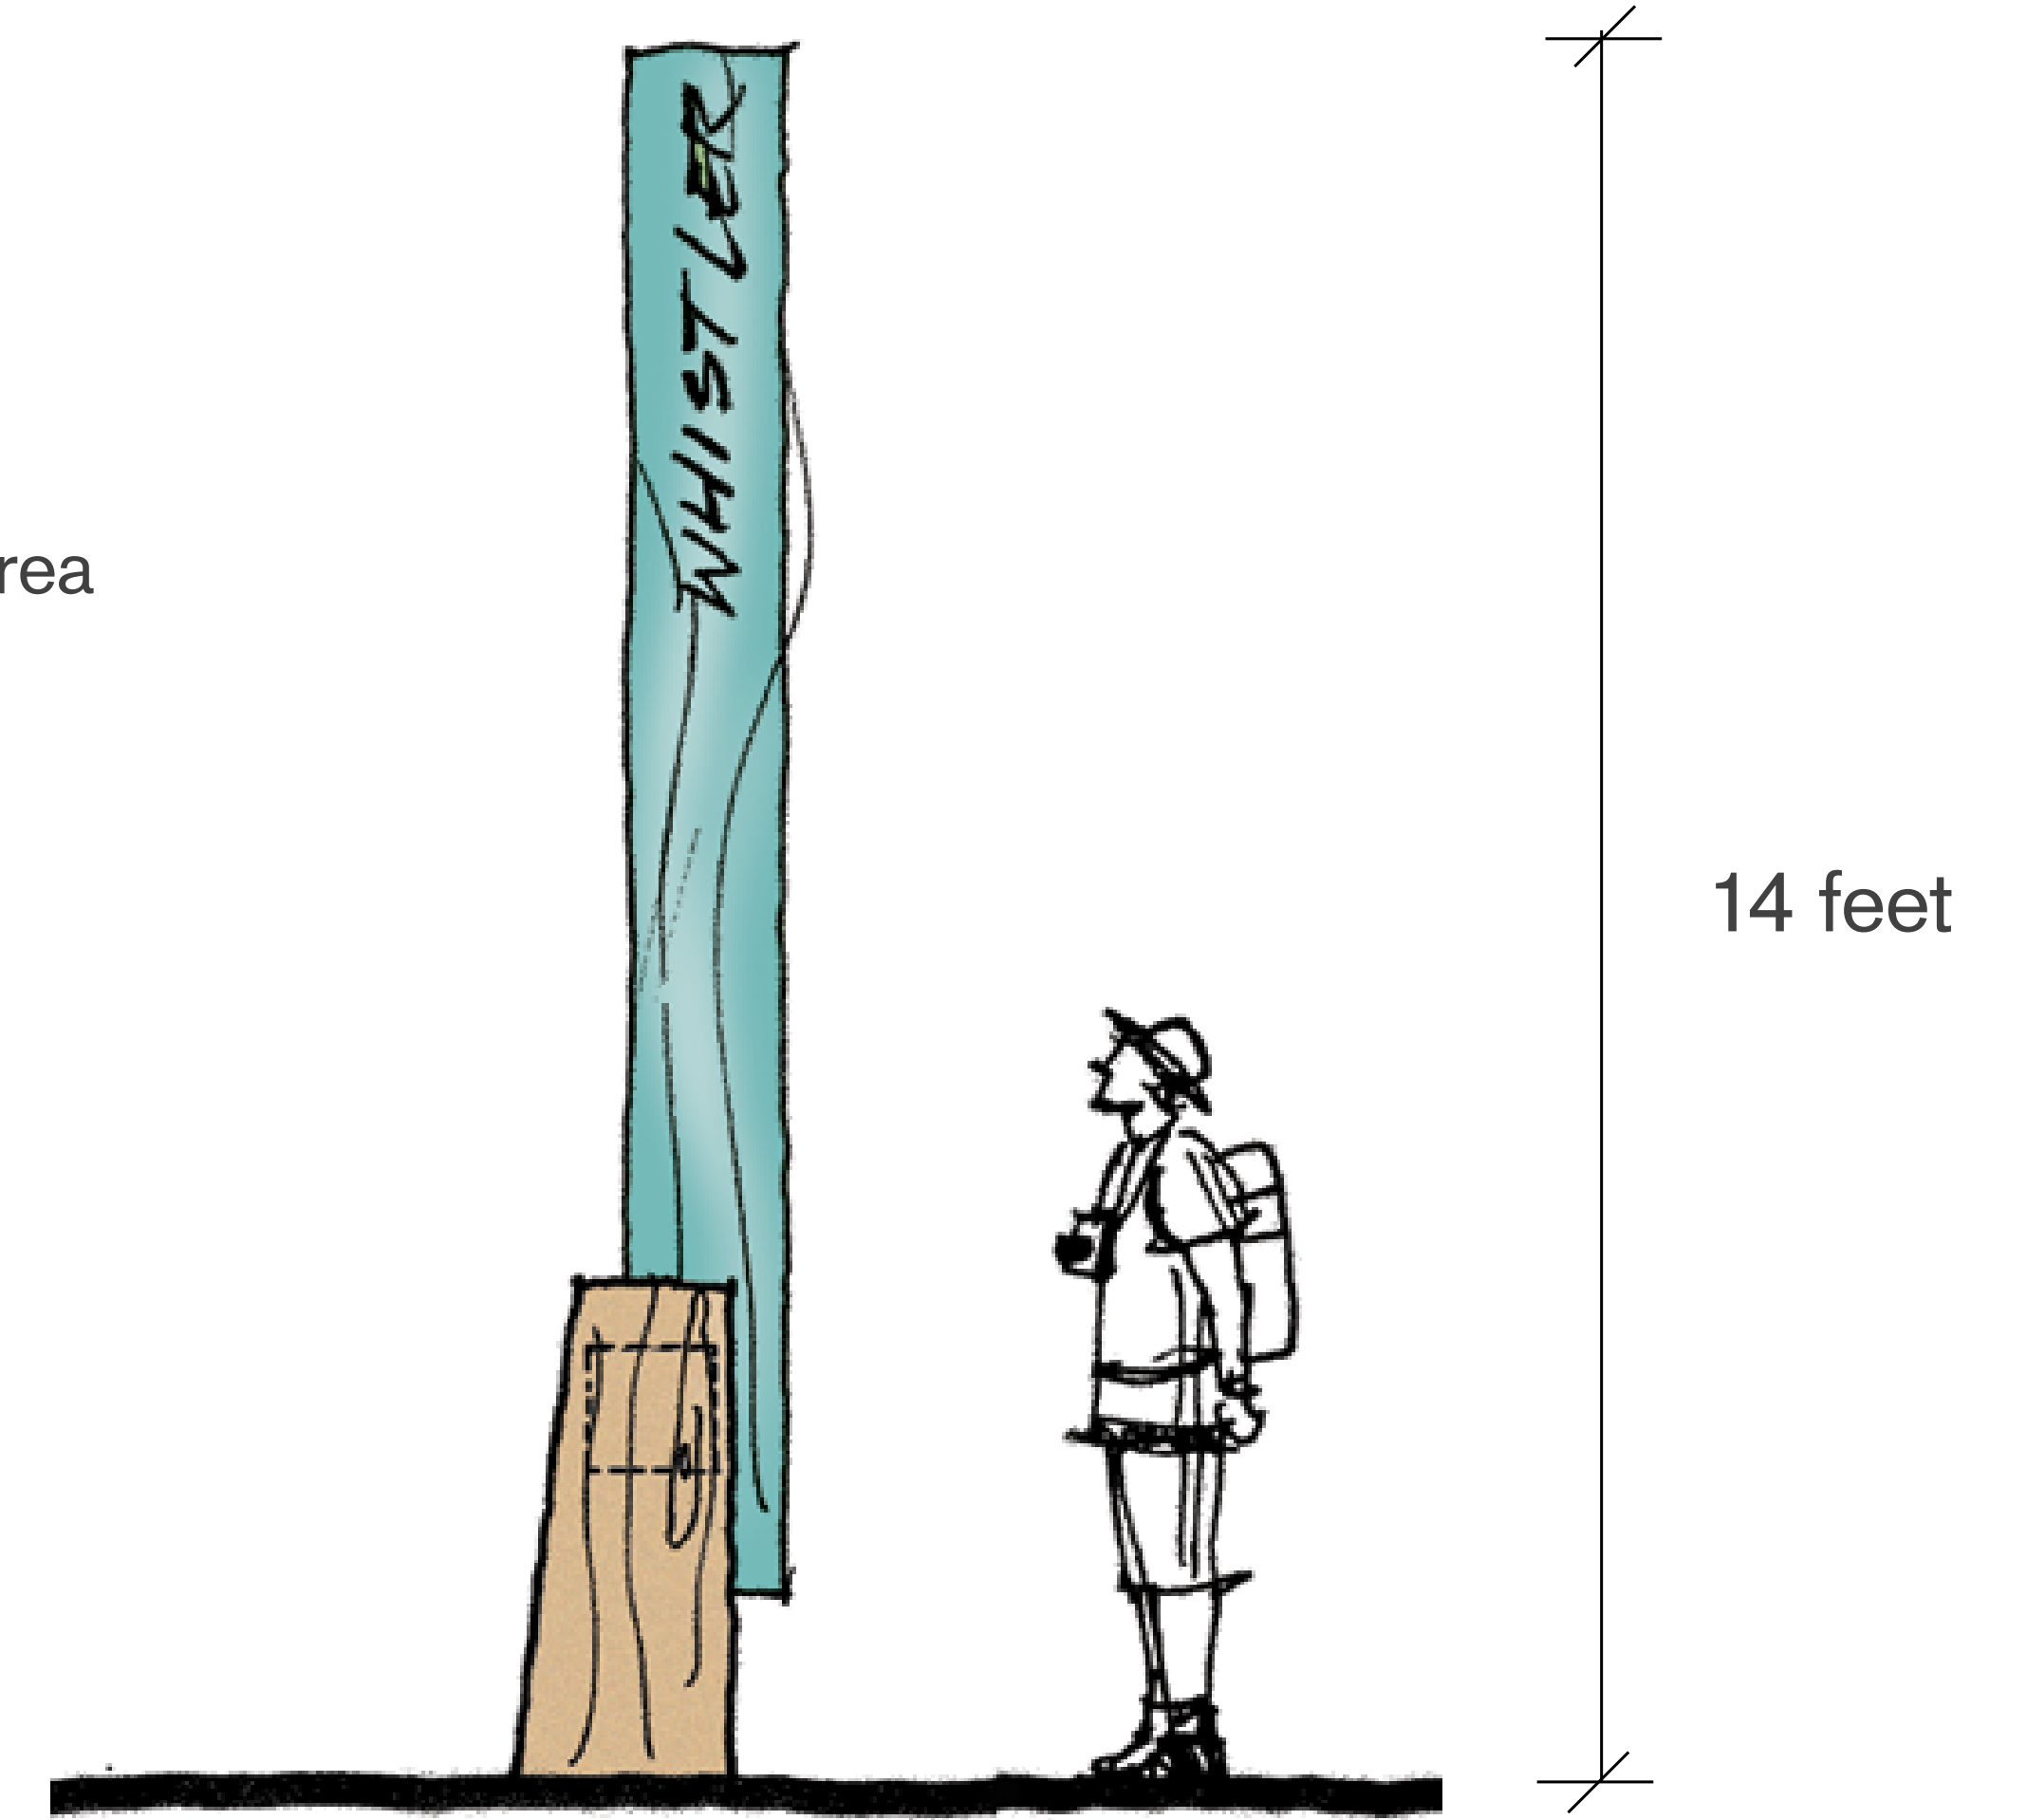

- base fabricated from solid wood beam

Elements of Distinction

- metal or wooden blade that fits into wood base
- considers input from the community

The Community Blade option

- integrates with the surrounding environment and history of area
- features a simple, contemporary geometric form
- is adaptable to other signage uses of different scales
- approximately 14 feet high
- could be illuminated

Community Rocks

Option A

Elements of Continuity

- boulder or rock; real or "faux"

Elements of Distinction

- considers input from the community

Option B

Elements of Continuity

- boulder or rock used as consistent base

Elements of Distinction

- sculpture or sign with community name and symbol attached to base designed in consultation with community

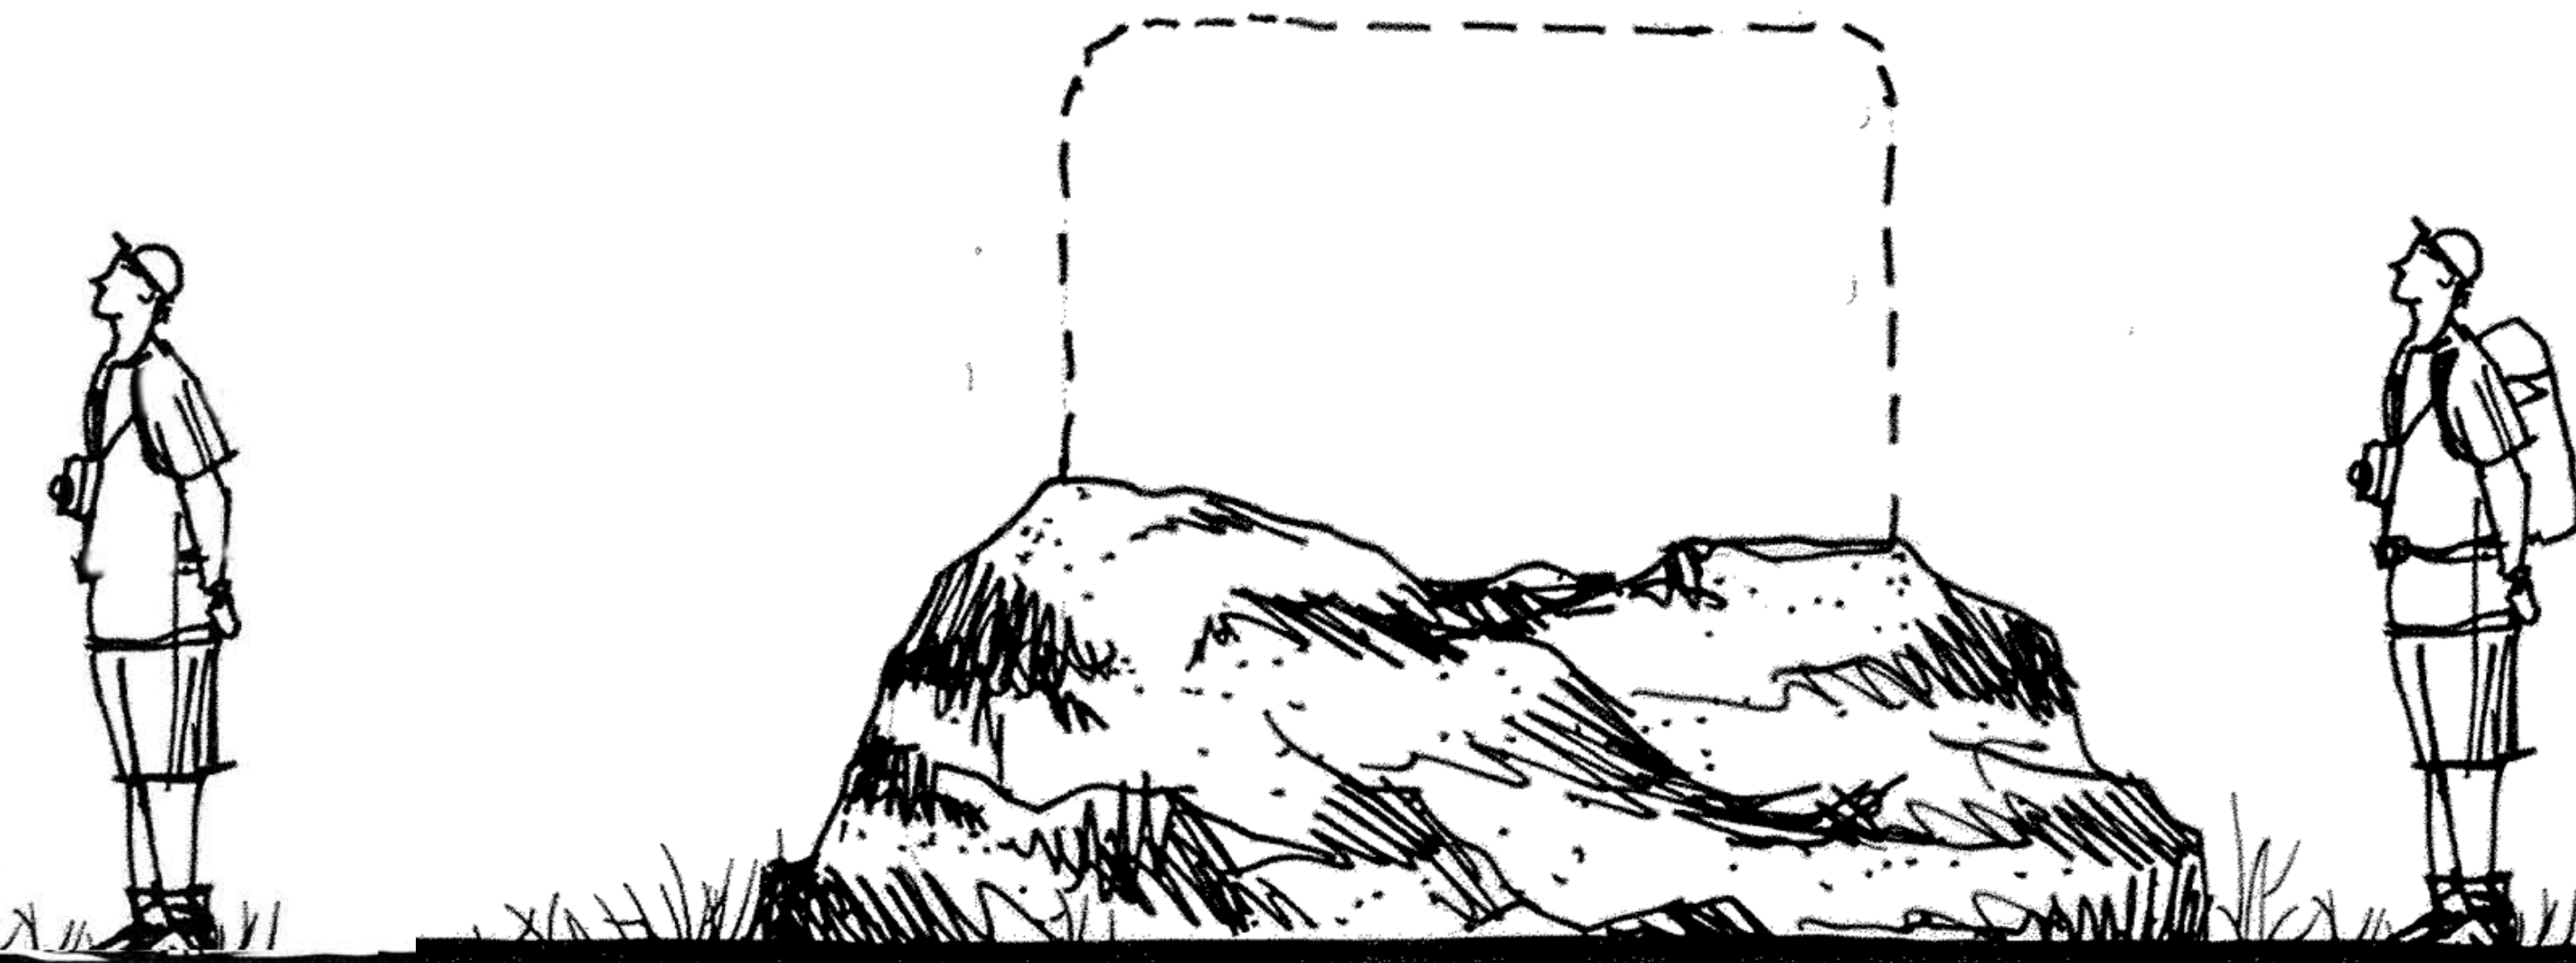

In Option A and B

- rock is approximately 8 feet high
- could be illuminated

Option A

Option B

8 feet
